CISSAM 2025

DOCUMENT INFORMATION			
Title	CISSAM		
Reference	CCRS/8007A/2024		
Issue No	1.1	Compiled By	Dafydd Marston CCRS Shooting Manager
Date	30 Aug 25		

PART 1 – CISSAM General Rules

Reference:

- A. Cadet Training – Ranges. Regulations for Training with Cadet Weapon Systems and Pyrotechnics (2022) (AC71855-C)
- B. Cadet Training - Skill at Arms. The L98A2 Cadet GP Rifle (5.56 mm) and Associated Equipment (71807-C)

Rules

- 1. These rules are to be observed in the spirit as well as the letter and are intended to be supplementary to Reference A.
- 2. The Exercise Director, Senior Planning Officer or Senior Range Conducting Officer (SRCO) is empowered to stop shooting at any time during the meeting should they consider that circumstances including the weather conditions warrant it. The Inter Services Matches Committee (ISMC) is empowered to alter the programme, including the cancellation of matches, should circumstances make it necessary.
- 3. Any dispute which cannot be resolved by the RCO will be settled by a meeting on the range of a protest committee consisting of the SRCO, Chairman and three members of the Inter Services' Cadet Matches Committee, a CCF Committee representative (as required), including those co-opted for that purpose for the meeting.

Safety

- 4. L98A2 drills are to be followed at all times. A cadet or CFAV who has an unauthorised discharge (UD) through an error of drill will render their WHT void and must receive instruction and a retest before they may fire again, and their score in the match in which the incident took place will be void. See Annex A for details.
- 5. On any matches involving movement:
 - a. If a firer trips and falls they must not fire until their rifle has been inspected by a safety supervisor.
 - b. If a firer drops their magazine from a pouch they may retrieve it, if it is safe to do so, at the discretion of the safety supervisor.
 - c. If a magazine drops off the rifle, it must not be reused in the match.
 - d. All forward movement where a magazine is fitted is to be considered fire with movement and will require 1:1 supervision; appropriately qualified team managers will be expected to assist on the range. Where the magazine is not fitted and providing the weapon has been cleared before forward movement takes place, this is not fire with movement and so the normal supervision ratios will be as determined by the RCO.

Eligibility

- 6. Firing teams are to consist of four firing cadets from the same SCC Area, ACF County or RAFAC Wing.
 - a. Coaches may be CFAV or cadets.

- b. A team of less than four cadets may be accepted subject to space and the approval of CCRS. Such a team are eligible for all individual prizes and inter services team selection but will not be listed or scored for team prizes.

7. Cadets competing in a firing team must be under 18 on the day of any competition they fire in.

Rifles and Ammunition

8. The L98A2 or L98A3 with no modifications must be used in accordance with Reference B, including the fitting and wearing of slings. The weapon must be fired with webbing or Viper vests.

9. Only ammunition issued at the meeting may be used; it will be issued immediately before the start of the practice and is not to be taken behind the firing point. Empty cases and unused rounds are to be returned to the ammunition point at the end of the shoot.

Dress and Equipment

10. The following dress standards are to be observed:

- a. Uniform is to be of service pattern and as issued. Badges of rank must be worn.
- b. Belts need not be worn.
- c. Over trousers of a non-service pattern are permitted in the event of wet weather.
- d. Improvised padding (eg hose tops) may be worn underneath uniform but must not be visible.
- e. An eye patch or blinder may be used when firing.
- f. Elbow and/or knee pads may be worn, which must be no more than 13mm thick when compressed.
- g. Gloves may be worn unless it interferes with the safe operation of the rifle.

11. Only the following optional equipment is allowed on the firing point:

- a. Ground sheets, which must be laid flat on the ground with no pegs. No padded sheet or mat is allowed.
- b. Handheld binoculars.

Hearing Protection

12. The use of MoD issued ear defenders on the firing point and when in the vicinity of the firing point as directed by the RCO is compulsory. Where ear defenders are required to be worn, berets are to be removed. MoD Issued ear defenders or MoD issued ear plugs are to be worn in the butts when firing is in progress.

Coaching

13. Coaching, where allowed by the match conditions, may be done by CFAV or cadets, who must hold an in date WHT for the weapon.

Ties, Targets, Marking and Scoring

14. Ties for first place in individual competitions will, unless otherwise stated in the match conditions, be determined by a countback.
15. Where available, Cadet Fig 11 and Cadet Fig 12 targets must be used. If these are not available, then they may be substituted with as close an equivalent as possible.
16. Targets will be marked in accordance with the match conditions. Excess hits on targets will be marked as follows:
 - a. Where a competitor or team fires more than the number of shots allowed, the score of the practice being fired will be zero.
 - b. Where the competitor or team fires the correct number of shots but there are more shots on the target than allowed (eg crossfire):
 - (1) Where the number of excess shots does not exceed 50% of the number of shots allowed the score will be adjusted by first cancelling the lowest value shot, then the highest value, alternating as such until the shots left are equal to the number allowed.
 - (2) Where the number of excess shots exceeds 50% of the number of shots allowed, the score will be decided by a reshoot. In the event of a reshoot the whole original shoot including sighters, where allowed, will be fired.
17. The signalled value or number of hits may only be challenged on non-electronic targets and may only be challenged once.
18. Protests on the procedure of a shoot (eg timings, frame breakages etc) must be made by the individual or team captain before the score is known or marked targets displayed. If upheld, the score made will be annulled and a reshoot will take place. If the protest is not upheld the score made will be taken; the competitor may subsequently challenge the value or number of hits.

Actions on an Unintended Discharge (UD) Extract from CT-R 2025

2-101 If a UD results in injury or damage, the accident procedure is to be used. If no injury or damage occurs as a result of the UD the Conducting Officer is to ensure the following UD procedure is taken with Cadet WS:

- a. Order the firer to apply the safety catch and lay the weapon down and get a member of the Safety Staff to take control of the weapon.
- b. Unload and inspect it and ensure that it is clear (**No attempt is to be made to strip or clean the weapon or magazine**).
- c. Record the weapon serial number, details of orders given, and the actions taken by the firer.
- d. Have the weapon and magazine inspected by an Armourer. **They may not be used until they have been certified as serviceable.**
- e. It is Mandatory that a ULA is conducted for all UD's by suitably qualified and experienced person, in order to provide qualified and objective assessment of causes and recommendations and thus support the development of a Just Culture.
- f. When a UD occurs, units are to report the incident to their local ATO, this can either be when the UD occurs (the preferred method of reporting) or on a monthly basis on MoD Form 1664 SAA unintended discharge. A copy of the AFC 351A - Weapon Inspection Report, is to be forwarded along with the report. In all cases a copy of the MOD Form 1664 is to be sent to the MID Cell.
- g. UD's in the RN environment should be completed iaw **BRd8988** and within the RAF environment iaw **AP8000 (Leaflet 8552)**. On each occasion, the relevant documentation must also be copied to the MID cell.

Remedial Training

2-102 All action taken must be iaw Single Service Cadet Policy. Any firer who unintentionally discharges a weapon is to receive remedial weapon handling training at the earliest opportunity. A UD will render any previous WHT result as void.

2-103 The firer may not be issued live or blank ammunition again until they have been successfully retested by a qualified and competent SAAI. **The retest result is to be recorded.**
